Checking up on how we've done!

Thomas Rice, publisher and editor of *The Bowser Report* has compiled the results for the 2015 Annual Historical Review. Featured in this rather lengthy document is every stock we've recommended. The *Historical Review* grows each and every year as we recommend more companies. The 2015 edition features a whopping 622 picks.

Over the years, we have had a number of picks do very well. To highlight these successes, 104 (38%) of our selections are currently up between 101% and 500%; 37 (13%) are between 501% and 1,000%; and 36 (13%) are above 1,001%. Of the 622 total Companies of the Month, 571 appreciated after we recommended them, with 392, or 63%, doubling or more. See the Bowser's Honor Roll below for the 27 companies that are current up over 1,500%.

The most consistent truth with the *Historical Review* is there are more stocks down than up. This year, 275 are currently up, while 347 are currently down. This, as always, highlights two very important lessons: (1) These are not stocks you buy and hold. **FOLLOW THE SELLING PLAN;** and (2) **DIVERSIFY.** . . . Despite the higher number of losers compared to gainers, if you add up all of the pluses and minuses, it comes to +179,003, up from 169,784% last year. Divide that total by the number of picks, and you get an average total gain of 288%!
